

Full Stack Engineer – Dagmawi Napoleon Bogale

Address – Addis Ababa, Ethiopia

Phone – +251931523923 || dagmawinapoleon02@gmail.com

Links – dagmawi.et || linkedin.com/in/dagin34 || github.com/dagin34

OBJECTIVE

Software Engineer with a strong foundation in full-stack development and a track record of building scalable, cloud-ready architectures. Expert in FastAPI, Next.js, and MERN, with experience optimizing enterprise back-end systems to reduce manual workloads by 60% and increasing efficiency and sales tracking by 40%. Committed to Agile delivery and high-performance engineering.

EDUCATION

Bachelors of Science in Software Engineering

HiLCoE School of Computer Science and Technology, Addis Ababa, Ethiopia – 3.75 GPA

Date – Mar 2022 – Feb 2026

Relevant Courses – Object Oriented Programming, Data Structures and Algorithm Analysis, Software Design and Architecture, Computer Systems Security, Artificial Intelligence, Computer Networking, Advanced Database Management

Advanced Data Structures & Algorithms

A2SV – Africa to Silicon Valley, Addis Ababa, Ethiopia

Date – Jan 2026 – Present

Relevant Courses – Chosen to be part of A2SV's competitive training program, where the focus is on deepening my problem-solving skills through Data Structures and Algorithms and a large floor to grow my international exposure.

WORK EXPERIENCE

Full Stack Developer, Blue Spark Business Technologies

July 2025 – Present

- Developed backend system using Python FastAPI with SQLAlchemy ORM and PostgreSQL for data management and SvelteKIT for a responsive and robust Frontend.
- Created modular RESTful API endpoints for Warehouse and Inventory management with multi-tenant support.
- Designed performance and KPI tracking modules with dynamic timeline filtering.
- Collaborated with frontend team delivering reusable UI components using Svelte Kit framework.

Backend Developer, Spring of Knowledge Academy

Nov 2024 – Feb 2025

- Built scalable backend using FastAPI and PostgreSQL to manage media uploads, content moderation, and real-time site sync.
- Designed custom APIs for gallery and event management, reducing manual content updates by 40%.
- Implemented secure workflows and ensured system reliability with Next.js and Python.

- Led backend development and integration for the platform using Node.js, Express, and React.
- Adapted to changing client requirements ensuring robust, maintainable code.

Technical Lead & Full Stack Dev, Eon Recycling**May 2025 – Sep 2025**

- Built a scalable backend using Node.js and Express.js together with MongoDB to manage news listings and a responsive and slick frontend integrated with the best SEO practices.
- Managed communications with clients to align on requirements and expectations and increased lead generation by 28%.

SKILLS

- **Front End:** Next, React, Svelte Kit, JavaScript, TypeScript, TailwindCSS, Framer
- **Back End** – Python, FastAPI, Node.js, Express.js, BetterAuth, Postman, Nest.js
- **Database** – MongoDB, SQL, SQLite, PostgreSQL, Firebase
- **Others:** Git, Docker, Figma, Selenium, Agile Methodologies, ERP Systems, SEO optimization
- **Soft Skills** – Communication & Collaboration, Adaptability, Problem Solving, Analytical Thinking, Details Oriented, Competitive Programming

PROJECTS

Blue Spark SFA | A Sales Force Automation App to enhance sales productivity

Team lead in the development of the KPI server and the asset management module, other features like RTM management, and MoR integration. Built with FastAPI and SvelteKIT.

Gojo Getaways | Vacation Home Management & Booking Ecosystem

Built a web application enabling property owners to list and manage rental homes built using MERN stack.

StreamSynx | Virtual movie streaming platform | [View Demo](#)

Created a synchronized movie-streaming experience for remote users. Integrated TMDB API for movie data and built host-controlled playback features using Next.js.
