OBJECTIVE

Full Stack Engineer with experience building enterprise SaaS platforms, APIs, and scalable business systems using TypeScript, FastAPI, React, Next.js, and PostgreSQL. Experienced in system design, RBAC, multi-tenant architectures, microservices, and business process automation. Comfortable working across backend infrastructure, frontend development, and cloud deployments in Agile teams.

EDUCATION

Bachelors of Science in Software Engineering

HiLCoE School of Computer Science and Technology, Addis Ababa, Ethiopia - 3.75 GPA

- Date - Mar 2022 - Feb 2026
- Relevant Courses - Object Oriented Programming, Data Structures and Algorithm Analysis, Software Design and Architecture, Computer Systems Security, Artificial Intelligence, Computer Networking, Advanced Database Management

Advanced Data Structures & Algorithms

A2SV - Africa to Silicon Valley, Addis Ababa, Ethiopia, 

- Date - Jan 2026 - Present
- Overview - Chosen to be part of A2SV's competitive training program, where the focus is on deepening my problem-solving skills through Data Structures and Algorithms and a large floor to grow my international exposure.

WORK EXPERIENCE

Full Stack Developer, Blue Spark Business Technologies, 

July 2025 - Present

- Developed backend system using Python FastAPI with SQLAlchemy ORM and PostgreSQL for data management and SvelteKIT for a responsive and robust Frontend.
- Led development of the Asset & KPI modules, now included in the highest subscription tier.
- Improved summarization performance by 5x through targeted backend refactoring and query optimization.
- Contributed to splitting the platform into microservices for independent deployments.
- Containerized local development environments using Docker.
- Built multi-tenant backend services with RBAC, ensuring secure tenant isolation and scalable access control for enterprise workflows.

Senior Full Stack Engineer, Andro Solutions, 

Jan 2025 - Present

- Architected and delivered full-stack SaaS and enterprise applications from requirements gathering through production deployment using FastAPI, Node.js, Next.js, React, Svelte, and PostgreSQL.
- Built auth systems using JWT, OAuth, and better-auth, and integrated third-party services like Chapa payments.
- Led code reviews, sprints, task allocation, and mentorship while collaborating with clients to translate business requirements into production software.
- Containerized applications with Docker and deployed production systems on VPS and Vercel.
- Built responsive, SEO-optimized web applications and real-time systems using WebSockets, including StreamSynx, a synchronized streaming platform serving over 25,000 users.

- Developed responsive e-commerce and booking applications using Next.js, React, TypeScript, and TailwindCSS for high-profile local organizations.
- Translated UI/UX designs into reusable, production-ready frontend components with a focus on performance and responsiveness.
- Collaborated with designers and backend engineers to deliver scalable, user-friendly web applications.
- Maintained clean, modular code while participating in feature development and Agile team workflows.

SKILLS

- **Languages** - TypeScript, Python, JavaScript
- **Front End** - Next.js, React.js, Svelte Kit, TailwindCSS, Figma, Framer
- **Back End** - FastAPI, Node.js, Express.js, BetterAuth, Postman
- **Database** - PostgreSQL, MongoDB, Firebase, SQL, SQLite
- **Architecture** - REST APIs, Microservices, RBAC, Multi-Tenant Applications
- **DevOps** - Docker, Git, Azure (Basic)

PROJECTS

Blue Spark SFA | A SaaS for Sales Force Automation

- Led development of the Inventory and KPI modules, implemented multi-tenant APIs with RBAC, integrated Ministry of Revenue services, contributed to microservice migration, and optimized backend performance using FastAPI, PostgreSQL, and SvelteKit.

StreamSynx | Synchronized Virtual Movie Streaming Platform | [View Demo](#)

- Built a real-time synchronized streaming platform serving over 25,000 users, implementing WebSocket-based playback synchronization, Firebase services, and TMDB integration with Next.js.

Gojo Getaways | Vacation Home Management & Booking Ecosystem

- Built a Full Stack property management and booking platform featuring property listings, user authentication, booking workflows, and responsive user experiences using MongoDB, Express.js, React, and Node.js.
